Objective

I am a FullStack Web Developer, I mostly focus on responsive website design and use the best practices to increase the performance of the website. I use MERN stack ie. MongoDB, ExpressJs, ReactJs, NodeJs. Also NextJS.

Education

- **Sal Institute of Technology and Engineering Research** 2024
Bachlor in Computer Engineering
8.20

Skills

- HTML
- CSS
- Javascript
- ReactJs
- ExpressJs
- NodeJs
- Python
- Bootstrap
- MongoDB
- ReduxJs

Projects

- **A Social Media Website Clone**
PandaSocial is one of my biggest project so far, it is a social media website where you can follow others and like their posts. Currently the Upload Image feature is not working but other features are working fine. I have made it responsive for both Mobile devices and Big screen Computer/ Laptops. If you visit my website, feel free to give any review. It is currently hosted on free servers so response time can sometimes be longer than expected. I have used MERN stack for this project. ie: MongoDB, ExpressJs, ReactJS, NodeJS. also some additional packages like ReduxJs

- **A Portfolio Website Template**
This is a Simple Portfolio website built with React JS, I haven't implemented any Server and database in this website, it is still in a development phase. I was just trying to create a design but I thought I should publish this.

- **A simple Notes Website**
a simple notes website that keeps your notes, it's built using base html, css and JavaScript.

<https://animeshsingh998.github.io/securenotes.github.io/>
- **Quiz app**
A simple quiz application where you have to answer multiple choice answers and you get a detailed performance result after the quiz is over.
