PROJECTS

Portfolio Website

🔗 <https://animeshwebdev.vercel.app/>

This is a Portfolio website built with React JS. While building this portfolio I liked the design so much that I made it my primary Portfolio.

Social Media Website Clone

🔗 <https://pandasocial.netlify.app>

PandaSocial is one of my biggest project so far, it is a social media website where you can follow others and like their posts.

Quiz Website

🔗 <https://animeshquiz.vercel.app/>

A simple quiz application where you have to answer multiple choice answers and you get a detailed performance result after the quiz is over.

Notes Tracker Website

🔗 <https://animeshsingh998.github.io/securenotes.github.io/>

A simple notes website that keeps your notes, it's built using base html, css and JavaScript.

SUMMARY

Hi there, myself Animeh and for the past five years, I have been developing full-stack websites. My primary area of expertise is designing responsive websites, and I employ best practices to boost the website's functionality and performance. I use MERN stack but I am also familiar with the newly launched NextJs.

STRENGTHS

Time Management

I always manage to complete my projects before the deadline so that I can perform any necessary changes if required.

Fluent English Communication

I was always excited to communicate in English during my school time, and I have practiced and made my vocabulary strong

Error Solving and Adaptability

I have faced tons of errors while designing websites but I have always found a solution by researching or using common sense.

Continuous Learning

I always keep learning new technologies so that I can be future ready.
